

ARCsoft Solutions

Custom Software Solutions

LabVIEW

C / C++ / C#

ARCsoft Solutions provides custom and off-the-shelf data acquisition and control systems.

We develop custom software for your existing equipment or assist you in your search for existing instruments that will suit you best.

Advanced control strategies: secure and reliable process control, custom-made instrument and data management.

Real-time data acquisition systems: from a few channels, for single processes, up to a multitude of inputs for larger applications. Our experience will be most useful in order to answer your synchronization, data storage, and analysis requirements.

Signal conditioning and processing (filtering, modeling, analysis, etc.): Our expertise and custom software can provide ideal substitutes for expansive hardware, such as spectrum analyzers, or complex standard software.

FEATURES & BENEFITS

Wide programming knowledge

LabVIEW, C, C++, C#, VHDL, Assembler.

Custom solutions that answer your needs. You can take benefit of our existing codes and libraries or we can develop custom applications for your instruments.

Easier learning curve. We provide a methodology that will help start your projects and will be easily upgradeable by your own programmers.

Turnkey Solutions. ARCOptix also provides measurement instruments. Their software can be modified as you see fit.

Our solutions will cost you a **fraction of the price** of standard hardware.

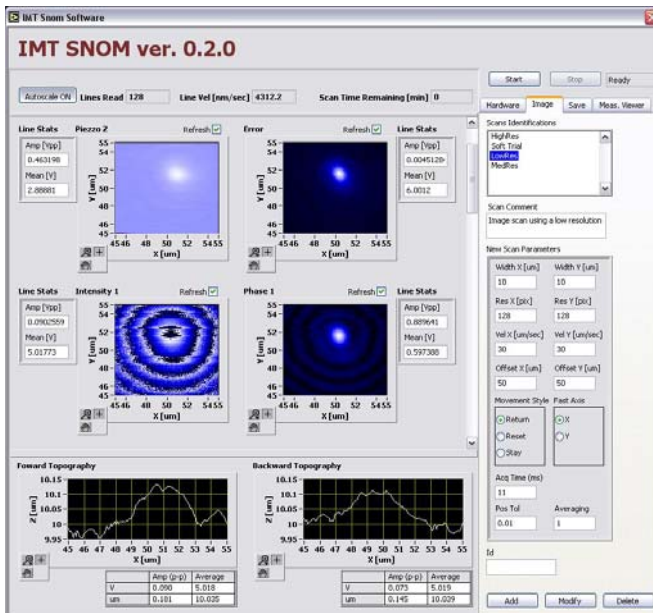

ARCsoft Solutions

Custom Software Solutions
LabVIEW
C / C++ / C#

ARCOptix
Switzerland

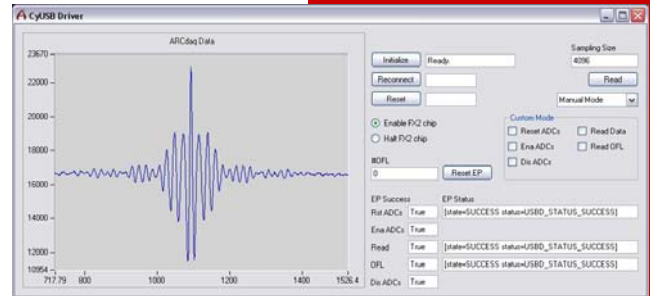

We build software for:

- Imaging
- Industrial control
- Spectral Analysis

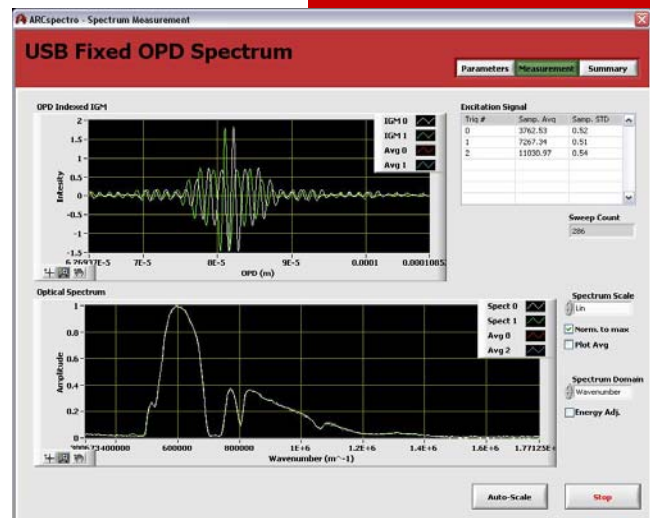

Snom Microscopy Imaging

- Quality testing (test benches)
- Filtering
- Instrument automation
- Instrument drivers
- Data classification

USB Oscilloscope

Spectrometry Characterization

ARCOptix is a company located in Neuchâtel (Switzerland) in the heart of the watch valley. For more information about ARCOptix, visit www.arcsoft.com
